Software Development Projects 2 Week Sprint

Njivoshi
JULY 2022 - JULY 2022

- Utilized a MERN stack (MongoDB, Express, React.js, Node.js) to build a full stack application in 3 weeks with full create, read, update, delete (CRUD) operations hitting all RESTful API calls.
- Used Google Maps API and Geolocation API to find locations searched and location of the user, and Geocode API to translate **the** latitude and longitude of new locations added by the user.

LeBron James Trivia
MARCH 2022 - MARCH 2022

- Built an app hosted on Github that renders in the browser using JavaScript, HTML,CSS.

Group Portfolio
MAY 2022 - JUNE 2022

- Deployed an interactive React application that renders data from a third-party API
- Worked with a team of 3 people to design an API using Node.js, Express, and Mongoose that serves JSON and built a front-end React application that updates the user interface and makes requests to the API
- I worked on the whole portfolio CSS, smart scroll, and contact information inputs

Professional Experience

Med-Tech | Red-Mountain| Phoenix, AZ
